SUMMARY

IT Support Technician and cybersecurity graduate with hands-on experience in help desk support, Windows administration, Microsoft 365, Azure, endpoint security tools, ticketing systems, troubleshooting, documentation, and user support. I also develop independent software projects, including Manga Shelf, a Flutter/Firebase mobile app.

I have a long-term interest in Japan shaped by my appreciation for the Japanese language, culture, history, and technology. I am actively studying Japanese toward the JLPT N3–N2 level and hope to use my IT background to build a meaningful career in Japan.

TECHNICAL SKILLS

Security Tools: SentinelOne, IronScales
IT Support Tools: HaloPSA, ServiceNow, N-Sight RMM, Data Cove Protection, UptimeRobot
Languages: HTML/CSS, Java, JavaScript, Dart, Python, SQL Basics
Cloud: Microsoft Azure, M365 Admin, Microsoft Lighthouse, Firebase
Databases: MySQL, Oracle, MongoDB, Cloud Firestore
Etc. Windows 10/11, Active Directory Basics, GPO basics, endpoint imaging/provisioning

PROFESSIONAL EXPERIENCE

Ally Communications

Apr 2026 - PRESENT

IT Support Technician

Responsibilities:

- Provide help desk and technical support for users, workstations, accounts, business applications, and general IT issues using HaloPSA for ticket management, documentation and issue tracking.
- Support and troubleshoot tools including SentinelOne, IronScales, N-Sight RMM, Data Cove Protection, CompanyCam, UptimeRobot, M365 Admin, Microsoft Azure, & Microsoft Lighthouse.
- Assist with user onboarding, device setup, account support, endpoint troubleshooting, security tool monitoring, escalation, and general MSP/help desk operations.

Pellera Technologies, TVA Browns Ferry

Jul 2023 – May 2026

Support Engineer

Responsibilities:

- Supported IT operations at TVA Browns Ferry, a high-accountability nuclear site environment, by triaging and resolving ServiceNow tickets with clear documentation and escalation notes.
- Imaged, provisioned, and supported Windows endpoints while assisting with workstation setup, endpoint hardening, remediation, and least-privilege practices.
- Performed basic Active Directory tasks, maintained device lifecycle records, supported asset tracking, and escalated potential technical or security concerns appropriately.

EDUCATION

Southern New Hampshire University

2021 - 2025

B.Sc. in Cybersecurity, concentration of Data Analytics

GPA: 3.84 | President's List, Dean's List, High Honors

Southern New Hampshire University

Present

B.Sc. in Game Programming & Development

GPA: 3.73

Technical Project

[Manga Shelf](#)

Independent Mobile App Project

Flutter | Dart | Firebase

- Developing and preparing to publish a manga collection tracking app for Android, recently approved for publication on the Google Play Store.
- Built the app using Dart and Flutter with Firebase services for backend functionality, including authentication, database storage, and cloud-based data management.
- Integrated API calls and Google Authentication/SSO to support user accounts, sign-in functionality, and app data features.

[LogShield Lab](#)

Independent Full-Stack Cybersecurity Project

React | TypeScript | Java Spring Boot | Python Flask | PostgreSQL

- Built an educational incident response dashboard prototype with synthetic log analysis, alert generation, incident tracking, analyst notes, and mock role-based access controls.
- Developed a full-stack local architecture using React, Spring Boot, Python Flask, and PostgreSQL, with backend APIs for incidents, demo log analysis, secure local upload handling, and persistent incident data.
- Created a public-safe hosted demo mode that disables real file uploads and uses built-in synthetic data to demonstrate cybersecurity workflows without collecting or processing sensitive information.

LANGUAGES

Japanese: Beginner to lower-intermediate, currently studying toward JLPT N3

English: Native
