Summary

Support Engineer at Peller Technologies. I build small, accessible web projects with HTML, CSS, and JavaScript. B.S. in Cybersecurity with a Data Analytics concentration (Aug 2025).

Skills

Web: HTML, CSS, JavaScript, Git, GitHub

IT: Windows administration, Linux basics, Active Directory, Device imaging, Hardware repair, Networking fundamentals, ServiceNow

Cybersecurity: Security fundamentals from coursework (access control, least privilege, basic risk concepts)

Selected Frontend Projects

- **Task Manager** — Minimal UI, keyboard friendly, localStorage.
Live: <https://tparrish21p.github.io/task-manager/>
- **Subscription Pricing Page** — Responsive layout using CSS Grid.
Live: <https://tparrish21p.github.io/subscription-pricing-page/>
- **Product Gallery** — Filterable gallery with simple JavaScript.
Live: <https://tparrish21p.github.io/product-gallery/>

Experience

Support Engineer I, Peller Technologies (TVA Browns Ferry) — 2023–Present

- Deploy and refresh PCs, install software, and resolve tickets in ServiceNow.
- Image devices and document fixes for repeat issues.
- Work with end users to reduce downtime.

Digital Shopper, Walmart Neighborhood Market — 2021–2023

- Picked and prepared online orders with accuracy and speed.
- Handled substitutions and customer questions.
- Coordinated with teams to keep fulfillment on time.

Dock Associate, Belk — 2019–2021

- Unloaded freight and organized inventory.
- Supported sales teams with timely replenishment.

Education

B.S., Cybersecurity (Data Analytics concentration) — Southern New Hampshire University (2024–2025)

GPA 3.84 • President's List, Dean's List, Honor Roll
